CASE STUDY | goibibo.com

VIZURY powered by affle

Goibibo drives up user engagement by **38%** with Vizury's app retargeting solution.

Challenge

- Install rates high but no uptick in conversion rates.
- High number of users abandoning from cart page.
- Highly competitive industry with strong players across a growing market.

Objective

Goibibo's primary objective was to,

- Bring back users who dropped off from the app and push them further down the buying journey. When users re-visited, it had to be to the hotel search page or a page lower in the funnel, which leads to an eventual booking.
- Drive down cost per visit of each user.

Goibibo engaged Vizury for its proven expertise in app retargeting – both on Facebook and non-Facebook inventory and the ability to personalize messaging for users at a 1:1 level.

Solution

1. Driving down cost per booking :

Vizury's bidding algorithm identified top converting users (users who had the most probability of booking a hotel) based on the 'purchase propensity score' for each user. This score is calculated using 40+ variables such as past conversion, time spent on the app, average booking value, hours since drop-off, etc.

Typically Vizury scores users based on conversions but here, the underlying model was tweaked such that scoring was based on past clicks which resulted in higher CTR than legacy campaigns.

These users are then mapped to different ad sets based on their propensity score. The ad creative used in each of these ad sets is customized i.e. each user sees a different image/offer on the ad, based on the hotel visited by him/her on the Goibibo app.

We then started bidding differently for each of these ad sets and the bids were adjusted according to the propensity score that gets refreshed on a daily basis. Essentially, users with a higher probability of booking were bid for higher compared to those with a lesser purchase propensity score, all the while maintaining the average cost per click. This helped improve click to session ratio by an exceptional 87%.

2. Reducing cost per visit:

Vizury actively started tracking apps where the ratio of users landing on the Goibibo app post click was low and stopped serving ads on these apps. We also refrained from targeting users who demonstrated a healthy click rate but poor landing rate, as this signified that they were either faced with slow internet or had uninstalled the app.

Vizury's brand-safe publisher inventory extends across multiple networks including Pubmatic, Appnexus, Mopub, etc. The focus however was on Facebook since redirects are lesser and hence, the proportion of users landing on the app is much higher. Cost per visit was reduced by as much as 20%.

Vizury focused on Facebook and Non-Facebook (Programmatic display) as a medium to run retargeting campaigns for Goibibo. This helped the bidding algorithm ensure cross channel synergy, thus maximising the output. The algorithm, using multiple variables, classifies users into different buckets and ensures that the right users at the right time are retargeted.

Results

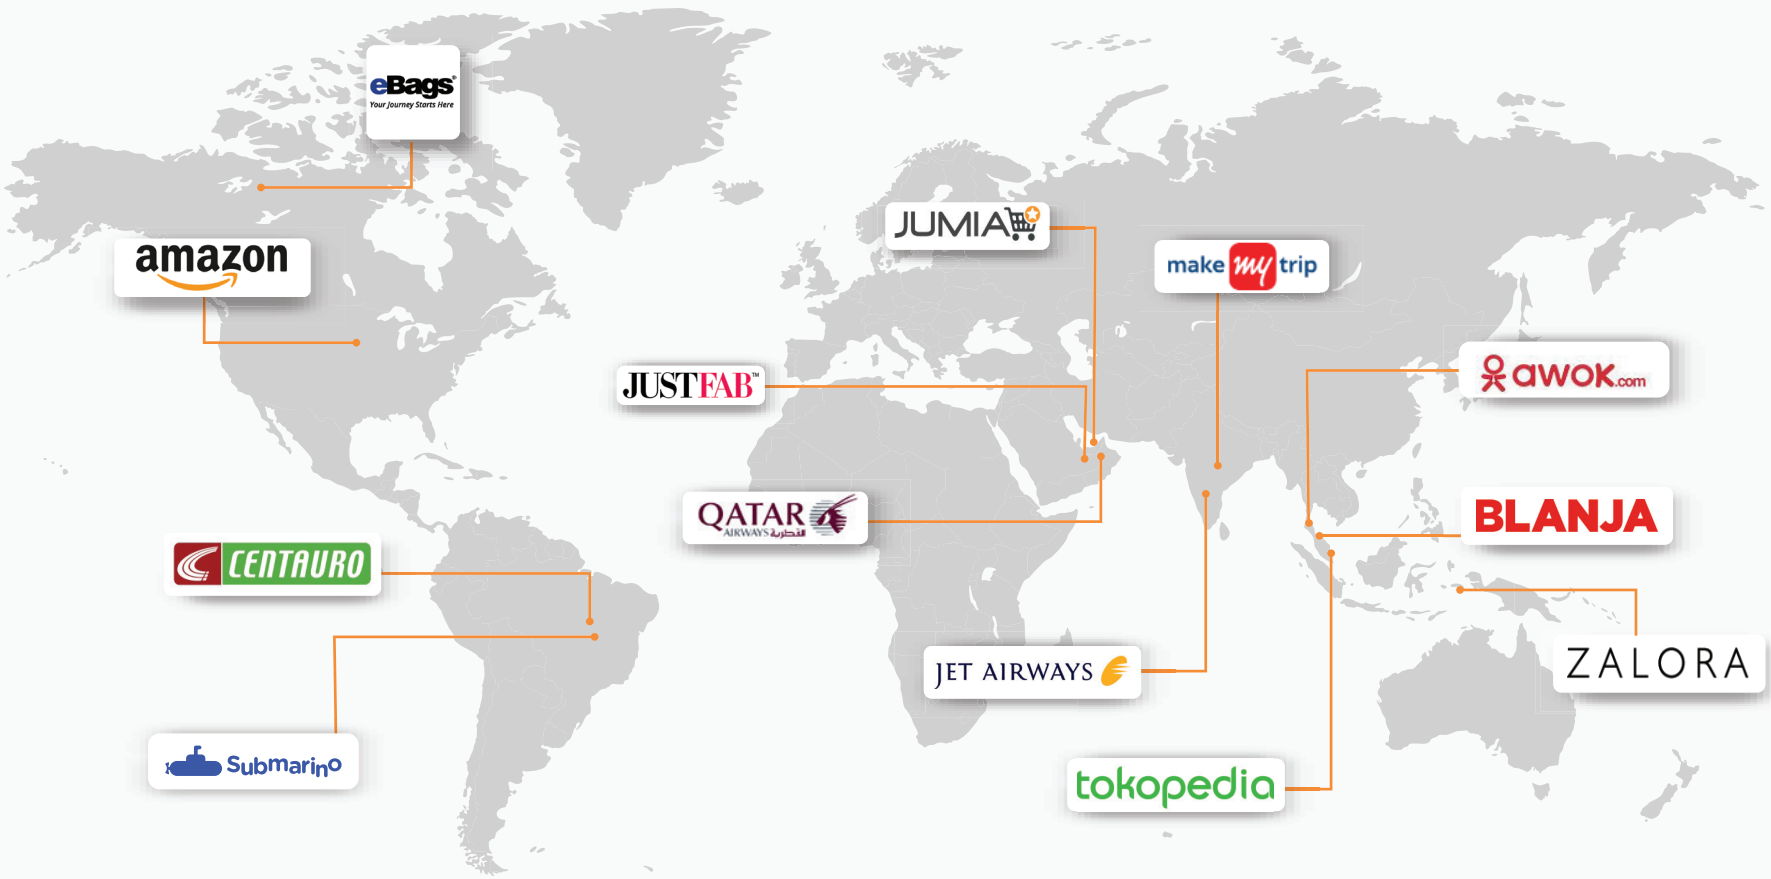
▲38% Improved click to session ratio

▼20% Reduced Cost per Booking and Cost Per Visit

▲1.35X CTR on Vizury's Facebook campaigns compared to legacy Facebook campaigns

▲6.5% app bookings contributed by Vizury

Powering Marketers & Top Enterprises Globally



goibibo.com

Goibibo is the largest online hotels booking engine in India and also one of the leading air aggregators. Goibibo is also the number one ranked mobile app under the travel category. Goibibo's core value differentiator is delivery of the fastest and the most trusted user experiences, be it in terms of quickest search and booking, fastest payments, settlement and refund processes. In 2014 & 2015, Goibibo was voted as the “Website of the Year India” and in 2016 Goibibo won “Best Tech Brands” by The Economics Times. 70% of hotel bookings take place on Goibibo’s mobile app.

Goibibo now owns India's No. 1 online Bus ticketing platform, redBus.in and recently launched the carpooling app, "ibibo Ryde".

VIZURY powered by affle

Vizury is a commerce marketing platform and its personalized retargeting stack is used by digital companies to grow marketing ROI and enhance transactions. Vizury’s retargeting platform is unique as it offers an integrated proposition to target and engage with the interested consumers over Programmatic, Social and Notification channels. This platform was launched in 2007 and after achieving global scale and success, the platform and business of Vizury was acquired by Affle in 2018.

After the acquisition of the Vizury platform, it has now become an integral product as part of Affle’s Consumer Platform. Affle started in 2005 and is a global technology company with a proprietary consumer intelligence platform that delivers consumer engagement, acquisitions and transactions through relevant Mobile Advertising.
